SCHOOL LIGHTING

PANELS & TROFFERS

Our panels, troffers, and skylight fixtures are the ideal lighting solutions for classrooms, offices, and hallways. Designed to deliver bright, uniform illumination, they create comfortable and productive environments for both learning and working. With a clean, modern appearance and energy-efficient performance, these fixtures easily integrate into new constructions or retrofits. Their reliable design ensures long-lasting operation, making them a smart choice for educational and professional spaces alike.

RETROFIT

Retrofitting existing fixtures is a smart, cost-effective solution that can offer significant energy savings and long-term benefits. By replacing outdated fluorescent fixtures with modern LED alternatives, facilities can reduce energy consumption, leading to substantial utility cost reductions over time. LED retrofits also have a longer lifespan and require less maintenance, minimizing operational disruptions and ongoing replacement costs.

HIGH BAYS

Our high bay lights deliver powerful, efficient illumination, making them ideal for gymnasiums, lunch areas, and other large spaces with high ceilings. Built with advanced LED technology, they offer excellent brightness, energy savings, and low maintenance over time. The durable design ensures reliable performance in busy environments, helping to create safe, comfortable spaces for students, staff, and visitors. Whether for daily use or special events, our high bays provide the lighting quality needed to support a wide range of activities.

EMERGENCY LIGHTING

We offer a reliable and energy-efficient exit sign option designed to enhance safety and meet code requirements. Featuring bright, easy-to-read lettering and a durable construction, our exit signs ensure clear visibility during emergencies. With long-lasting LED technology and options for battery backup, they provide dependable performance when it matters most. Ideal for schools, universities, and commercial buildings, our exit sign is a simple yet essential solution for guiding occupants to safety.
